When King Edward visited him just before the former's departure on the vacation he is now enjoying he is known to have hinted that he thought the premier's retirement much to be desired. Sir Henry entirely ignored these suggestions, and his majesty evidently lacked the courage to press the point. Chancellor of the Exchequer Asquith, who is already aoxing for Sir Henry, will undoubtedly succeed the latter.

Jenkins, of Wisconsin, who wanted Mr. Terry to explain whether or not the proposed bill would not take away from the States all power to regulate the running of automobiles within their borders. Although in express language, the bill sets forth that under the license granted by Federal authority the automobile must abide by all State laws governing automobiles, except those referring to registration, Mr. Jenkins and the majority of the other committeemen were unable to overcome their fears in regard to possible violation of the sanctity of the State police power under the proposed measure.

At the close of the hearing it was apparent to all that the bill was doomed for the present, as far as the Judiciary Committee is concerned. # We Pay \$2.10

We could buy beans as low as 30c per bushel, yet we pay \$2.10 for ours.

The reason is this: We buy Michigan beans, because a certain soil there produces the best beans grown. Then we select them by hand, so we get only the whitest,

the plumpest, the fullest-grown.

We hake these beans in ovens heated up to 245 degrees. That fierce heat is required to make beans digestible, and you can't apply it. That is why home-baked beans are heavy

## We Pay \$3.45

We could buy tomato juice for 75c a barrel. Yet we pay \$3.45 for just the tomatoes used in a barrel of ours. The difference is this: Cheap sauce is made from toma-

canning factory. Such sauce is not rich. Ours is made from whole tomatoes-ripened on the vines-picked when the juice fairly sparkles.

The result is this: Our beans are nutty, yet mealy. Our sauce has a flavor, a tang, a zest which. Nature alone can give.
